Scope of the journal

The prime focus of Tectonophysics will remain on high-impact original research and reviews in the fields of kinematics, structure, composition, and dynamics of the solid Earth at all scales. Tectonophysics particularly encourages submission of papers based on the integration of a multitude of geophysical, geological, geochemical, geodynamic, and geotectonic methods.

Tectonophysics welcomes contributions of three types:
-Regular Papers
-Fast track papers for short, innovative rapid communication, which will usually be reviewed within three weeks after submission
-Comprehensive review articles which provide an overview of significant subjects
