Scope of the journal

The prime focus of *Tectonophysics* will remain on high-impact original research and reviews in the fields of kinematics, structure, composition, and dynamics of the solid Earth at all scales. *Tectonophysics* particularly encourages submission of papers based on the integration of a multitude of geophysical, geological, geochemical, geodynamic, and geotectonic methods.

Tectonophysics welcomes contributions of three types:

- Regular Papers
- Fast track papers for short, innovative rapid communication, which will usually be reviewed within three weeks after submission
- Comprehensive review articles which provide an overview of significant subjects
